Experience

Java Spring Boot (Self-Driven Projects)

Freelance / Personal Development | 2026–Present

- Developed scalable Spring Boot backend applications with REST APIs, validation, authentication, role-based authorization, clean MVC architecture, and frontend integration (React)

Education

- Bachelor of Science in Information Technology
- KES Shroff College (Kandivali), Expected Graduation: 2026
- CGPA: 7.56
- Higher Secondary Certificate (HSC – 12th): 2023
- Percentage: 69.50%
- Secondary School Certificate (SSC – 10th): 2020
- Percentage: 83%
- Credit Courses:**
 - Prompt Engineering, AI and Machine Learning
 - Recommendation Systems

Projects

Smart Internship Management System

- Designed and implemented role-based authentication and authorization for Students, College Administrators, and Industry Representatives.
- Built RESTful APIs using Spring Boot following clean architecture and modular design principles.
- Developed a responsive frontend using React.js with seamless API integration.
- Enabled students to apply for internships, enroll in skill-development courses, and participate in college-organized hackathons and events.
- Created an industry dashboard to post internship opportunities and manage student applications.
- Developed a college administration module to create courses, organize hackathons, and monitor student participation and performance.
- Integrated MySQL for structured relational data and MongoDB for flexible document-based storage.
- Focused on scalability, maintainability, and performance optimization across the application

RFID-Based Student Attendance System

- Technologies: Spring Boot (Java), Hibernate, MySQL, React, ESP8266, RFID reader, LED display
- Developed an RFID-enabled student attendance management system integrating hardware with a web-based platform.

- Implemented backend services using Spring Boot with Hibernate ORM and MySQL for real-time attendance recording.
- Built a **React-based frontend** for administrators to view, track, and manage student attendance dashboards.
- Integrated ESP8266 microcontroller with an RFID reader to capture student scan events and transmit data to the server via Wi-Fi.
- Added LED display support to provide instant validation feedback during attendance marking.

Hackathon Experience

Prompt the Future – College-Level Hackathon

KES Shroff College (Organized by IT, Data Science, and Finance Departments)

- Participated in a college-level hackathon event promoting AI innovation, prompt engineering, and cloud development.
- Executed critical thinking and collaborative development skills.

Technical Skills

- Programming Languages: Java, C++, SQL
- Frameworks: Spring Boot, Express.js, Hibernate, Spring MVC, React
- Frontend Technologies: HTML5, JavaScript, React, Bootstrap, Tailwind CSS
- Database Technologies: MySQL, MongoDB
- Tools: Git, Docker, IntelliJ IDEA, VS Code, Postman
- Concepts: Data Structures & Algorithms, Object-Oriented Programming (OOP), REST APIs

Certifications

- Java Programming and Software Engineering Fundamentals Specialization – Coursera
- Prompt the Future Hackathon – Participation Certificate
